1. Before start registration process please remember that all NMNTs need to be on active session or if vSpace trial version expired, they need to try to connect server (black screen will be on).

Product registration is required after 30 days of use. Until the product has been registered vSpace cannot be updated and user sessions are limited to one hour. Select "vSpace Registration" in the Windows Start menu.

At any time during the registration process, you can click on the "Cancel" button and the process will be cancelled, or you can use the "Back" button to return to previous screens in the registration process to change your entries.

2. At the registration program "welcome" screen, if vSpace password protection is turned on, you will need to enter your password. Then Click the [Next] button.

3. In the case of Online Registration, follow the instructions below. Otherwise skip to the section titled "Offline Registration". If you want to online register your software and E-Series access devices, leave the "Register" radio button selected, and click "Next."

7. Select the "Register online, using your internet connection" and click "Next."

8. Before the registration wizard communicates with the registration server, you will get the following "Summary" screen showing all user information that will be registered with the vSpace software. Also, any connected but unregistered E-Series access devices will be listed for registration. If the data is correct, click on the "Register" button or click "Back" if you wish to change any of the information.

 Connection - then you get a registration progress screen followed by "Registration results."

When your registration is complete, you see the "Registration results" screen. Be sure to click the check box for the "Register future E-Series devices in the background" option, if you want vSpace to automatically register any unregistered E-Series access devices that connect to this system in the future. Use of this "background registration" feature requires standard internet connectivity.
